

PIA Short-Term Securities Fund Advisor Class (PIASX)

Summary Prospectus
March 30, 2015

Before you invest, you may want to review the PIA Short-Term Securities Fund's (the "Fund") Statutory Prospectus and Statement of Additional Information, which contain more information about the Fund and its risks. The current Statutory Prospectus and Statement of Additional Information dated March 30, 2015, are incorporated by reference into this Summary Prospectus. You can find the Fund's Statutory Prospectus, Statement of Additional Information and other information about the Fund online at www.piamutualfunds.com. You can also get this information at no cost by calling 1-800-251-1970 or by sending an email request to piamutualfunds@pacificincome.com.

Investment Objective

The Fund's investment objective is to seek a high level of current income, consistent with low volatility of principal through investing in short-term investment grade debt securities.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

SHAREHOLDER FEES (fees paid directly from your investment)	None
ANNUAL FUND OPERATING EXPENSES (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.20%
Distribution and Service (Rule 12b-1) Fees	None
Other Expenses	<u>0.20%</u>
Total Annual Fund Operating Expenses	0.40%
Less: Fee Waiver ⁽¹⁾	-0.01%
Net Annual Fund Operating Expenses	<u><u>0.39%</u></u>

(1) Pacific Income Advisers, Inc. (the "Adviser") has contractually agreed to waive all or a portion of its management fees and pay expenses of the Fund to the extent necessary to limit Net Annual Fund Operating Expenses for the Fund (excluding acquired fund fees and expenses ("AFFE"), interest, taxes and extraordinary expenses) to 0.39% of the Fund's average daily net assets (the "Expense Cap"). The Expense Cap will remain in effect through at least March 28, 2016, and may be terminated only by the Trust's Board of Trustees (the "Board" or the "Trustees"). The Adviser may request recoupment of previously waived fees and paid expenses from the Fund for three years from the date they were waived or paid, subject to the Expense Cap.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same (taking into account the Expense Cap only in the first year). Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$40	\$127	\$223	\$504

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 38% of the average value of its portfolio.

Principal Investment Strategies of the Fund

The Fund is a diversified investment company that normally invests at least 80% of its net assets in short-term securities having a duration of less than three years. Under normal market conditions, the Fund purchases securities rated BBB or better by a nationally recognized rating agency.

The Fund primarily invests in securities issued or guaranteed by the U.S. Government and its agencies, investment grade mortgage-backed securities (including commercial mortgage-backed securities), and investment grade debt securities (including asset-backed securities and collateralized mortgage obligations).

The Fund may invest up to 20% of its net assets in debt futures contracts, option contracts, options on securities and options on debt futures. The Fund may invest in these types of derivative securities for both bona fide hedging purposes and for speculative purposes.

The Fund may invest up to 10% of its net assets in other investment companies (mutual funds and exchange-traded funds (“ETFs”)), including any mutual fund advised by the Adviser (“PIA Fund”), provided that investment in an investment company that predominantly invests in high yield securities will count towards the Fund’s limitation of no more than 5% of the Fund’s net assets invested in high yield securities. To the extent that the Fund invests in a PIA Fund, the Adviser will waive any management fee charged by the PIA Fund.

Duration is a measure of a debt security’s price sensitivity. Higher duration indicates bonds that are more sensitive to interest rate changes. Bonds with shorter duration have lower risk associated with interest rates. Duration takes into account a debt security’s cash flows over time including the possibility that a debt security might be prepaid by the issuer or redeemed by the holder prior to its stated maturity date. In contrast, maturity measures only the time until final payment is due. The weighted average duration of the Fund portfolio will generally range from six months on the short end to three years on the long end.

The Adviser may invest up to 100% of the Fund’s total assets in high-quality, short-term debt securities and money market instruments for temporary defensive purposes.

In selecting investments for the Fund, the Adviser primarily will consider credit quality, duration and yield. The Fund’s annual portfolio turnover rate may exceed 100%.

The Adviser may sell a security as part of its overall investment decision to reposition assets into a more attractive security or to implement a change in maturity and quality to the overall portfolio.

Principal Risks of Investing in the Fund

Losing all or a portion of your investment is a risk of investing in the Fund. The success of the Fund cannot be guaranteed. There are risks associated with investments in the types of securities in which the Fund invests. These risks include:

- **Market Risk.** The prices of the securities in which the Fund invests may decline for a number of reasons including in response to economic developments and perceptions about the creditworthiness of individual issuers.
- **Management Risk.** The Fund is an actively managed portfolio. The Adviser’s management practices and investment strategies might not work to produce the desired results.
- **Interest Rate Risk.** Interest rate risk is the risk that fixed income securities will decline in value because of changes in interest rates. It is likely there will be less governmental action in the near future to maintain low interest rates. The negative impact on fixed income securities from the resulting rate increases for that and other reasons could be swift and significant.
- **Credit Risk.** The issuers of the bonds and other debt securities held by the Fund may not be able to make interest or principal payments.
- **Prepayment Risk.** Issuers of securities held by the Fund may be able to prepay principal due on these securities, particularly during periods of declining interest rates. Securities subject to prepayment risk generally offer less potential for gains when interest rates decline, and may offer a greater potential for loss when interest rates rise. Prepayment risk is a major risk of mortgage-backed securities.
- **Portfolio Turnover Risk.** A high portfolio turnover rate (100% or more) has the potential to result in the realization and distribution to shareholders of higher capital gains, which may subject you to a higher tax liability. A high portfolio turnover rate also leads to higher transactions costs.
- **Risks Associated with Asset-Backed Securities.** These include Market Risk, Interest Rate Risk, Credit Risk and Prepayment Risk (each described above). Asset-backed securities may decline in value when defaults on the underlying assets occur and may exhibit additional volatility in periods of changing interest rates. When interest rates decline, the prepayment of assets underlying such securities may require the Fund to reinvest that money at lower prevailing interest rates, resulting in reduced returns.
- **Risks Associated with Mortgage-Backed Securities.** These include Market Risk, Interest Rate Risk, Credit Risk and Prepayment Risk (each described above) as well as the risk that the structure of certain mortgage-backed securities may make their reaction to interest rates and other factors difficult to predict, making their prices very volatile. In particular, events related to the U.S. housing market in recent years have had a severe negative impact on the value of some mortgage-backed securities and resulted in an increased risk associated with investments in the securities.
- **Liquidity Risk.** Low or lack of trading volume may make it difficult to sell securities held by the Fund at quoted market prices.
- **Derivatives Risk.** Derivatives involve the risk of improper valuation, the risk of ambiguous documentation and the risk that changes in the value of the derivative may not correlate perfectly with the underlying security.
- **Leverage Risk.** Leverage risk is the risk that losses from a derivative instrument may be greater than the amount invested in the derivative instrument. Certain derivatives have the potential for unlimited losses, regardless of the size of the initial investment.
- **Adjustable Rate and Floating Rate Securities Risks.** Although adjustable and floating rate debt securities tend to be less volatile than fixed-rate debt securities, they nevertheless fluctuate in value.

- **Risks Associated with Inflation and Deflation.** Inflation risk is the risk that the rising cost of living may erode the purchasing power of an investment over time. Deflation risk is the risk that prices throughout the economy decline over time – the opposite of inflation.
- **ETF and Mutual Fund Risk.** When the Fund invests in an ETF or mutual fund, it will bear additional expenses based on its pro rata share of the ETF’s or mutual fund’s operating expenses, including the potential duplication of management fees. The risk of owning an ETF or mutual fund generally reflects the risks of owning the underlying securities that the ETF or mutual fund holds. The Fund also will incur brokerage costs when it purchases ETFs.
- **High Yield Securities Risk.** Securities with ratings lower than BBB or Baa are known as “high yield” securities (commonly known as “junk bonds”). High yield securities provide greater income and opportunity for gains than higher-rated securities but entail greater risk of loss of principal.

Performance

The following performance information provides some indication of the risks of investing in the Fund by showing changes in the Fund’s performance from year to year and by showing how the Fund’s average annual returns for 1, 5, and 10 years compare with those of a broad measure of market performance. The Fund’s past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available on the Fund’s website at www.piamutualfunds.com or by calling the Fund toll-free at 1-800-251-1970.

Calendar Year Total Returns as of December 31

During the period shown on the bar chart, the Fund’s highest total return for a quarter was 1.89% (quarter ended March 31, 2008) and the lowest total return for a quarter was -0.25% (quarter ended June 30, 2013).

Average Annual Total Returns

(for the periods ended December 31, 2014)

PIA Short-Term Securities Fund

	1 Year	5 Years	10 Years
Return Before Taxes	0.35%	0.53%	2.05%
Return After Taxes on Distributions	0.07%	0.30%	1.32%
Return After Taxes on Distributions and Sale of Fund Shares	0.20%	0.32%	1.32%

BofA Merrill Lynch 1-Year U.S. Treasury Note Index

(reflects no deduction for fees, expenses or taxes)

0.18% 0.41% 2.00%

Barclays Capital U.S. Government/Corporate 1-Year Duration Index

(reflects no deduction for fees, expenses or taxes)

0.34% 0.64% 2.16%

The after-tax returns were calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor’s tax situation and may differ from those shown, and after-tax returns are not relevant to investors who hold shares of the Fund through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts (“IRAs”). The Return After Taxes on Distributions and Sale of Fund Shares is higher than other return figures when a capital loss occurs upon the redemption of Fund shares.

Management

Investment Adviser: Pacific Income Advisers, Inc. is the investment adviser of the Fund.

Portfolio Managers: The following individuals serve as the Fund’s portfolio managers:

<u>Portfolio Managers</u>	<u>Years of Service with the Fund</u>	<u>Primary Title with the Adviser</u>
Bistra Pashamova, CFA	16	Vice President, Portfolio Manager
Lloyd McAdams, CFA, CEBS	7	President and Chief Investment Officer
Evangelos Karagiannis, Ph.D., CFA	7	Managing Director

Purchase and Sale of Fund Shares

You may purchase, exchange or redeem Fund shares on any business day by written request via mail (PIA Short-Term Securities Fund, c/o U.S. Bancorp Fund Services, LLC, P.O. Box 701, Milwaukee, Wisconsin 53201-0701), by telephone at 1-800-251-1970, or through a financial intermediary. You may also purchase or redeem Fund shares by wire transfer. Investors who wish to purchase, exchange or redeem Fund shares through a financial intermediary should contact the financial intermediary directly. The minimum initial and subsequent investment amounts are shown below.

Type of Account	To Open Your Account	To Add to Your Account
Regular	\$1,000	\$50
Retirement Accounts	\$100	\$50
Automatic Investment Plan	\$50	\$50

Tax Information

Fund distributions are taxable, and will be taxed as ordinary income or capital gains, unless you invest through a tax-deferred arrangement such as an IRA or 401(k) plan. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Fund through a broker-dealer or other financial intermediary, the Fund and/or the Adviser may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
