Corporate Composite consists of portfolios benchmarked to the Barclays U.S. Corporate Bond Index and is constructed from all major corporate sectors. Portfolios managed in this style tend to be conservative in terms of sector weights, quality and duration ranges, compared to that of the index. The composite may invest in sectors that are not included in the Index and may not necessarily be representative of its benchmark. Prior to April 1, 2009, the composite was named the Corporate Only Composite. The minimum account size for this composite is \$1 million.

Additional information regarding the treatment of significant cash flows is available upon request. Past performance is not indicative of future results.

Net of fee performance was calculated using the highest management fee of 0.30%. Prior to 12/31/09, the highest management fee used was 0.40%. The highest management fee may change over time. The annual composite dispersion presented is an equal-weighted standard deviation calculated for the accounts in the composite the entire year. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

The cash allocation policy for periods prior to 1/1/10 applied a target cash allocation of 2%. The cash returns are represented by the Merrill Lynch 90day T-Bill index.

The management fee schedule is as follows: 0.40% on the first \$10 million, 0.30% on the next \$40 million, and 0.25% on the balance. Actual investment advisory fees incurred by clients may vary.
