

## PIA MODERATE DURATION MACS

INVESTMENT OBJECTIVE<sup>1</sup>

PIA's Moderate Duration MACS Strategy seeks to outperform the Bloomberg Barclays Aggregate Index over a full economic cycle, with equal to or lower volatility.

## INVESTMENT PHILOSOPHY

We know that the various sectors within the bond market are periodically torqued by cyclical, monetary or market pressures, which can lead to mispricings and create opportunities to produce excess return. We intend to exploit these periodic opportunities by risk-adjusting the various bond market sectors, utilizing yield curve and sector analysis, and fundamental bottom-up risk measurement. We seek to capitalize on these opportunities to earn above-average risk-adjusted yields, while creating the potential for capital gains as these sectors revert toward their fair value.

## THE FIRM

Ownership	<b>Independent and Employee-owned</b>
Inception	<b>1986</b>
Location	<b>Santa Monica, California</b>
Employees	<b>28</b>
Firm Assets	<b>\$5 billion</b>
Strategy Assets	<b>\$375 million</b>
GIPS Verified	<b>Yes</b>
Firm Verifier	<b>ACA Performance Services, LLC</b>

## INVESTMENT PROCESS

- » **Yield Curve and Sector Analysis** PIA deconstructs the bond market into yield curve, quality and industry sectors and utilizes quantitative yield curve and sector analysis to identify sectors that are undervalued on a risk adjusted basis. We further apply qualitative bottom-up fundamental analysis to identify the issues that best reflect our sector views.
- » **Security Research** We combine fundamental top-down industry analysis with bottom-up fundamental security and ratio analysis to select credit securities. Additionally, we utilize multi-factor models that produce value and risk metrics to identify attractive Mortgage-backed and Asset-backed Securities.
- » **Portfolio Construction** Portfolio Managers construct portfolios to meet the strategic portfolio objectives set forth by the PIA Investment Strategy Group for duration, sector weights and yield curve positioning. The PIA Neural Network, which produces probabilistic insights into factors affecting sector valuations, is a tool utilized by the Investment Strategy Group in tactical decision-making. Credit securities are selected by our credit analysts, while mortgage-backed securities are selected with the support of our MBS specialists. PIA believes that diversification is the optimal method to manage security specific risk. PIA utilizes proprietary (completion) mutual funds to invest in BBB-rated credits, as well as securitized debt to offer accounts the benefit of greater diversification.
- » **Portfolio Management** Portfolio Managers strive to consistently maintain the risk / return composition goals stated in the client's investment policy statement (IPS). The firm's Portfolio Administrator is responsible for quarterly verification that client portfolios adhered to their IPS.

<sup>1</sup>There is, of course, no assurance that these goals will be realized. Portfolio values will fluctuate as market conditions change.

<sup>2</sup>The portfolio characteristics shown above relate to a single account as of the date noted above, deemed by Pacific Income Advisers to be generally representative of its standard account. Not every client's account will have these exact characteristics. The actual characteristics with respect to any particular client account will vary based on a number of factors including but not limited to: (i) the size of the account; (ii) investment restrictions applicable to the account, if any; and (iii) market exigencies at the time of investment. Percentages shown may not total 100% due to rounding and/or incidental allocation to cash.

Data is obtained from Yield Book and Barclays Live systems and is assumed to be reliable.

The Bloomberg Barclays U.S. Aggregate Bond Index represents securities that are SEC-registered, taxable and dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities and asset-backed securities. These major sectors are subdivided into more specific indices that are calculated and reported on a regular basis. You cannot invest directly in an index.
