¹The ICE BofAML 1-Year US Treasury Note Index is comprised of a single issue purchased at the beginning of the month and held for a full month. At the end of the month that issue is sold and rolled into a newly selected issue. The issue selected at each month-end rebalancing is the outstanding Treasury note that matures closest to, but not beyond, one year from the rebalancing date. To qualify for selection, an issue must have settled on or before the month-end rebalancing date. You can not invest directly in an index.

²Net of fee performance was calculated using the highest annual management fee of 0.25%, applied to the gross results on a monthly basis. Prior to 12/31/06, the highest management fee was 0.30%. Prior to 9/30/00, the highest management fee was 0.40%.
