

## INVESTMENT OBJECTIVE

**PIA's Core Plus Strategy** seeks to outperform the **Bloomberg Aggregate Index** over a full economic cycle, with similar volatility.

## INVESTMENT PHILOSOPHY

**We know** that the various sectors within the bond market are periodically torqued by cyclical, monetary or market pressures, which can lead to mispricings and create opportunities to produce excess return. **We intend** to exploit these periodic opportunities by risk-adjusting the various bond market sectors, utilizing yield curve and sector analysis, and fundamental bottom-up risk measurement. **We seek** to capitalize on these opportunities to earn above-average risk-adjusted yields, while creating the potential for capital gains as these sectors revert toward their fair value.

## THE FIRM

Ownership	<b>Independent and Employee-owned</b>
Inception	<b>1986</b>
Location	<b>El Segundo, California</b>
Employees	<b>14</b>
Firm Assets	<b>\$2 billion</b>
GIPS Verified	<b>Yes</b>
Firm Verifier	<b>ACA Performance Services, LLC</b>

## INVESTMENT PROCESS

- » **Sector & Industry Analysis** PIA seeks to identify sectors that offer attractive risk-adjusted value. The concept of mean reversion is integral to our yield curve analysis of investment grade sectors, as we expect those sectors to revert to their fair value after being torqued by market inefficiencies. For non-investment grade sectors, we are willing to underweight or completely avoid industries that we believe do not warrant leveraged finance throughout a full business cycle.
- » **Security Research** Given the asymmetric return potential in credit, we take a defensive approach in selecting securities that we believe are undervalued and provide attractive yield per unit of risk. Portfolios are highly diversified via the PIA Completion Funds for exposures to BBB Credit, High Yield Credit and Mortgage-Backed Securities (MBS). Investment Grade Corporate security analysis is focused on securities with sound fundamentals and liquidity. High Yield Corporate security selection is very granular in the less followed smaller issues, where we believe we have an information advantage. In the securitized debt space, PIA employs option-cost analysis that utilizes multi-factor interest and prepayment rate models.
- » **Duration Management & Yield Curve Positioning** Duration is driven by both our relative value sector model and the firm's fundamental outlook, which leads to both a strategic and tactical duration opinion. Barbell or bulleted structures are driven by quantitative yield curve analysis accompanied by a fundamental overlay.
- » **Portfolio Construction** The Investment Strategy Group uses quantitative and fundamental inputs to set sector weights, duration decision and yield curve positioning for the portfolios. Sector weights reflect our the firm's opinion on relative value across sectors adjusting for current fundamentals, spreads and spread volatility. The allocation to the Completion Funds for BBB Credit, High Yield and Mortgage-Backed Securities is a function of sector valuation models and the fundamental outlook for those sectors. Security selection is based upon analyst research to identify securities that best meet the risk-return objectives of the portfolio.

## ANNUALIZED PERFORMANCE<sup>1</sup> as of 12.31.23

<sup>1</sup>Periods less than one year are not annualized.

Core Plus Composite consists of portfolios benchmarked to the Bloomberg U.S. Aggregate Bond Index and is constructed from all major fixed income sectors. Portfolios managed in this style seek to maximize total return and allow the use of non-investment grade securities as well as other non-benchmark sectors. The composite will tactically invest in sectors outside the index (typically ranging from 10% - 40%) and hold more concentrated positions to enhance returns and diversify risk. There is no account minimum.

Returns are presented gross and net of fees and include the reinvestment of all income. Gross and net of fee returns are net of all transaction cost. Past performance is not indicative of future results. The U.S. Dollar is the currency used to express performance. Core Plus Composite was created May 2015. The inception date is June 30, 2008.

Net of fee performance was calculated using the highest annual management fee of 0.35%, applied to the gross results on a monthly basis.

The management fee schedule is as follows: 0.35% on the first \$25 million, 0.30% on the next \$25 million, and 0.25% on the balance. Actual investment advisory fees incurred by clients may vary.

Pacific Income Advisers is an investment management firm registered with the U.S. Securities and Exchange Commission under the Investment Advisers Act of 1940. PIA manages a variety of fixed income and equity assets for primarily United States clients.

Investing involves the risk of loss, including the loss of principal invested. A few of the main risks facing a fixed income strategy like this include Interest Rate Risk, Credit Risk, High Yield Securities Risk, Government Sponsored Entity Risk and Risks associated with Mortgage-Backed Securities. For a full description of these and other risks facing the portfolio please review the Risk of Loss section in our ADV Client Brochure. Past performance is not an indicator of future results.

PIA claims compliance with the Global Investment Performance Standards (GIPS®). GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

To receive a complete list and description of PIA's composites and or a GIPS Report, contact Nicholas Parenti, at (310) 255-4427 or by email at [nparenti@pacificincome.com](mailto:nparenti@pacificincome.com).

The portfolio characteristics shown above relate to a single account as of the date noted above, deemed by Pacific Income Advisers to be generally representative of its standard account. Not every client's account will have these exact characteristics. The actual characteristics with respect to any particular client account will vary based on a number of factors including but not limited to: (i) the size of the account; (ii) investment restrictions applicable to the account, if any; and (iii) market exigencies at the time of investment. Percentages shown may not total 100% due to rounding and/or incidental allocation to cash.

Data is obtained from Yield Book and Barclays Live systems and is assumed to be reliable.

The Bloomberg U.S. Aggregate Bond Index represents securities that are SEC-registered, taxable and dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities and asset-backed securities. These major sectors are subdivided into more specific indices that are calculated and reported on a regular basis. You cannot invest directly in an index.
